Areas of Interest — Fullstack Development, Software Engineering, System Design, and Software Architecture

Skills

Languages Python, Java, SQL, HTML/CSS, JavaScript
Frameworks React, Next.js, Node.js, FastAPI
Tools Git, Docker, Supabase, MySQL, Figma
Concepts REST APIs, OCR Processing, Responsive UI/UX

Work Experience

Teaching Assistant - Computational Problem Solving (CPS)

Amrita Vishwa Vidyapeetham

Sep 2025 – Jan 2026

Coimbatore, India

- Selected for the role based on strong performance in **Python** and algorithmic problem-solving.
- Mentored a cohort of over **100 students** in Python programming fundamentals and problem-solving techniques.
- Conducted lab sessions covering algorithmic concepts including searching, sorting, and recursion.
- Assisted students in debugging assignments and improving their problem-solving approaches during lab sessions.

Open Source Contributor | Winter of Code (WoC)

Remote

Dec 2025 – Jan 2026

Open Source

- Merged **10+ pull requests** across **6+ open-source repositories**, fixing bugs and implementing new features.
- Collaborated with maintainers through code reviews and discussions to ensure contributions met project standards.
- Worked within large codebases while following established **Git workflows** for distributed development.

Projects

EvoViz || [Link](#) || [Github](#)

Evolutionary Algorithm Visualization Tool

Feb 2026 – Mar 2026

University Project

- Refactored the frontend to support a modular component architecture, improving maintainability and enabling easier feature additions.
- Built interactive visualizations using **React**, **Recharts**, and **Plotly.js** to display evolutionary algorithm behavior and performance metrics.
- Collaborated with contributors to integrate new visualization components and improve usability of the interface.
- Optimized rendering performance for larger datasets by improving chart updates and component state management.

Quote Processor || [Github](#)

Automated Quote and Invoice Processing System

Jan 2026

Hackathon Project

- Developed the backend processing pipeline using **FastAPI** during the Build-to-Break hackathon, producing a system that passed stress testing with **zero reported issues**.
- Built a multi-format ingestion pipeline using **Pandas**, **PyPDF**, and **Pytesseract** to extract structured data from PDF and Excel files using OCR.
- Containerized the application with **Docker**, enabling easier deployment and portability.
- Designed the processing workflow to support future document formats and automated OCR pipelines.

TA Applications Dashboard || [Link](#) || [Github](#)

Teaching Assistant Application Management Portal

Nov 2025 – Dec 2025

CSE Department, Amrita Vishwa Vidyapeetham

- Built a centralized admin dashboard using **Next.js** to streamline the collection and review of Teaching Assistant applications.
- Implemented secure authentication using **NextAuth** for faculty access to the admin dashboard.
- Integrated a relational backend using **Supabase**, replacing manual tracking with an automated workflow.
- Designed reusable UI components to maintain consistent design across application management features.

Education

Amrita Vishwa Vidyapeetham

Bachelor of Computer Science and Engineering

CGPA: 8.66

Jul 2024 – Present

Coimbatore, India

Maharishi Vidya Mandir

Higher Secondary Education - 91%

Jun 2022 – Jun 2024

Hosur, India
